Field View, 2 Bales Open Cotton per Acre

Stalk Containing 3 Pounds  
Seed Cotton

Bostwick, Ga., Oct. 31st, 1911.

We the undersigned have this day carefully inspected Bostwick's Big Boll Prolific Cotton in fields. We find that bolls are extra large, 50 bolls making a pound of seed cotton. We find also that bolls are well matured, and scarcely none of them are faulty or defective. We further find that bolls grow very thick on limbs therefore the name "BIG BOLL PROLIFIC." We also find that leaves are small, which adds to the opening quality, and lessens liability of rotting. We observe further, in cotton that will make a bale to a bale and a half per acre, and has never been picked, there is none on the ground, although there has been several heavy rains since it opened.

We saw a bale of this cotton ginned and it turned out 38.7 per cent of lint to seed cotton.

Considering this cotton from every standpoint, we have never seen a better variety.

**Note** This cotton planted June 1st was practically all open by October 15th. This will show the earliness of this cotton, especially for a big boll variety. This cotton will be found to be one of the most valuable for planting on this account in the boll weevil territory.

**R. L. PEACOCK, Ordinary Morgan County, Ga.**

I have been farming twenty-five years. I have tried every variety of cotton with any reputation, but find the above far superior to any cotton I have ever seen.

Price of Seed (30 lbs. to bushel), sack lots \$2.50 a bushel; 10 to 15 bushels \$2.00 a bushel; 25 to 50 bushels \$1.50 a bushel; 100 bushel lots \$1.25; car lots \$1.10 a bushel. All sacked in new 100 pound weight sacks.

Send All Orders to N. L. Willet Seed Co., Augusta, Ga.
